

November 11th, 2026

08:00	Opening ALICE	
08:15	Live case transmission from Essen	
10:00	Post-embolization discussion	
10:15	Coffee break	
10:30	Live case from Santander	
11:45	Post-embolization discussion	
12:00	BANANAZ at ALICE: Mythbusting: What we need to unlearn	Discover BANANAZ
13:00	Lunch	
13:30	Live case from Essen: MCA Aneurysm	
14:15	Post-embolization discussion	
14:30	Live case from Santander	
15:15	Post-embolization discussion	
15:30	Coffee break	
16:00	STROKE	
16:00	Super large bore catheters: Do we really need them?	Omer Eker
16:10	discussion	
16:15	Calcified plaque: not a problem anymore	Adnan Siddiqui
16:25	discussion	
16:30	Recanalization of chronic ICA occlusion: how stable is the result?	Vincent Costalat
16:40	discussion	
16:45	SAPT or DAPT in tandem occlusion?	Jonas Schübler
16:55	discussion	
17:00	Round table discussion coordinated by Wim van Zwam, Vincent Costalat and Adnan Siddiqui	
18:30	End of Session	

November 12th, 2026

08:00	Aneurysms: Debate braid deformation	
08:00	Braid deformation is underestimated and requires special care	Laurent Spelle
08:05	discussion	
08:10	Braid deformation is overrated	Hans Henkes
08:15	discussion	

08:20	So what?	Fabian Arnberg Sandor
08:25	<i>discussion</i>	
08:30	Live case from Essen: AVM treated by TVE	
09:45	Post-embolization discussion	
10:00	Coffee break	
10:15	Live case from Bordeaux	
11:00	Post-embolization discussion	
11:15	Live case from Essen: MCA Aneurysm with treated with Microchap	
11:45	Post-embolization discussion	
12:00	Statistics for INRs: What do statistics hide?	
12:00	Statistics for INRs: What do statistics hide?	Sylvain Sardy
12:40	Q&As	
13:00	Lunch	
13:30	Live case from Essen: Typ 3 Dural Fistula of the petrous apex	
14:00	Post-embolization discussion	
14:15	Live case from Bordeaux:	
14:45	Post-embolization discussion	
15:00	AVM & dural fistulae	
15:00	Pressure Cooker Technique in superficial AVMs	Vincent Costalat
15:10	<i>discussion</i>	
15:15	TVE in AVMs at the cerebellopontine angle	Tomoaki Terada
15:25	<i>discussion</i>	
15:30	Technological Advances in angiographic imaging: the engineer's perspective	Andreas Berting
15:40	<i>discussion</i>	
15:45	6D imaging: when to stop embolization according to the cast within the AVM	Shinya Hagiwara
15:55	<i>discussion</i>	
16:00	6D imaging: venovenous anastomosis	Ahmed Ayad
16:10	<i>discussion</i>	
16:15	MR after Obtura	Elif Yamac
16:25	<i>discussion</i>	
16:30	6D imaging: how much did it change our practice	René Chapot
16:40	<i>discussion</i>	
16:45	Coffee break	
17:00	Type 3 & 4 DAVF: TVA vs TVE vs surgery	
17:00	TVA	Vittorio Civelli

17:05	discussion	
17:10	TVE	Markus Möhlenbruch
17:15	discussion	
17:20	Surgery	Erez Nossek
17:25	discussion	
17:30	ALICE in trouble	
18:30	End of Session	

November 13th, 2026

08:00	cSDH: How much embolization is needed?	
08:00	We need to embolize more	Erez Nossek
08:05	discussion	
08:10	Embolization is overrated	Uday Limaye
08:15	discussion	
08:20	Discussion	Fabian Arnberg Sandor
08:30	Live case: Dural fistula from Essen	
10:15	Post-embolization discussion	
10:30	Coffee break	
10:45	Live case from Istanbul: Aneurysm	
11:30	Post-embolization discussion	
11:45	Live case from Essen:	
12:15	Post-embolization discussion	
12:30	Intrasacular Devices: proper sizing	
12:30	We implement before we understand	Alex Szólics
12:35	discussion	
12:36	Pitfalls of sizing softwares: how to handle	Vincent Costalat
12:41	discussion	
12:42	Is there a place left for bypass surgery?	Erez Nossek
12:47	discussion	
12:48	FDs: the more, the better?	Maksim Shapiro
12:53	discussion	
12:54	FD, FD light or PAO?	René Chapot
12:59	discussion	
13:00	Lunch	
13:30	Live case from Essen:	

14:00	Post-embolization discussion	
14:15	Live case from Istanbul: Aneurysm	
14:45	Post-embolization discussion	
15:00	Venous Stenting	
15:00	How much, how long, which side, when to control	
15:07	discussion	
15:10	Stenting out of the box	Vittorio Civelli
15:50	discussion	
16:00	END of ALICE 2026
